

Accelerating Business, Accelerating Careers

Xela Spotlight

Information Technology Infrastructure and Security

As many companies are moving their technology operations from traditional infrastructure platforms to cloud-based platforms and services, they are faced with several challenges. Transformation initiatives demand both old and new skill sets that can be hard to find. Additionally, technologies and processes used to ensure secure operations are evolving every day.

The Xela Group can help you manage these and other challenges with Infrastructure and Security. We provide talented IT professionals with the right technical, functional, and industry experience you need.

Our Infrastructure expertise:

- Cloud Enablement and Transformation
- Network Engineering and Operations
- Database Architecture and Administration
- Data Center Architecture and Operations
- DevOps Infrastructure Support
- Application Maintenance
- Continuity/Disaster Recovery
- Desktop Support
- Service Desk Management

Our Security expertise:

- Cyber Security Engineering
- Infrastructure Security Engineering
- Governance, Risk and Compliance (GRC)
- Vulnerability Assessments and Remediation
- Independent Verification and Validation (IV&V)
- Information Assurance Engineering
- DevSecOps

Notable Successes

INFRASTRUCTURE SUPPORT FOR A MAJOR RETAIL COMPANY

- Challenge** A major retail company wanted to move parts of its infrastructure and network operations back in-house to increase flexibility and help prepare for a cloud infrastructure migration.
- Solution** We created a recruiting task force and process focused on quickly sourcing and onboarding consultants with niche retail operational experience in areas such as network engineering and support, server administration, desktop support, cloud architecture, development, telecommunications engineering, and others. Throughout the process we worked closely with the client's teams to understand their requirements and objectives for each of the roles.
- Results** In less than 6 months we provided 42 consultants, with over half of those starting in the first 2 months.

Notable Successes

DATA CENTER CONSOLIDATION AND CONTINUED OPERATIONS

- Challenge** A large telecommunication company was faced with a data center consolidation effort because of a merger with a similar sized company.
- Solution** We worked closely with the client's IT Operations leadership to staff a dedicated PMO to provide oversight for the consolidation while ensuring operational stability and support for continued business growth. Additionally, we provided 30 DBA's and System Administrators to support consolidation activities and fill gaps left by the recent merger.
- Results** Required staffing levels were achieved very quickly, and as needed throughout and after the consolidation, key resources were given the opportunity to become permanent employees for the client.

Other Successes

- > Cybersecurity engineering and regulatory compliance support for a large entertainment communications company
- > Vulnerability assessment resourcing for a leading information assurance company
- > Support for a merger-related data center consolidation involving one of the nation's largest financial institutions
- > Staffed network infrastructure engineers to support a large system integrator's VOIP implementations

Why Choose The Xela Group

Founded by a core group of industry experts with 20-25+ years of experience each, **the Xela Group provides IT talent and solutions that reduce your hiring lifecycle and drive collective success.**
